INSTALLATION GUIDE

Product code: DL9RGBW-BT1

90 mm 9 W Smart Colour Downlight – Bluetooth

We recommend a licensed electrician for the whole install – they must fit the light and its ceiling plug base (AS/NZS 3000). You can do the app setup afterwards.

IN THE BOX

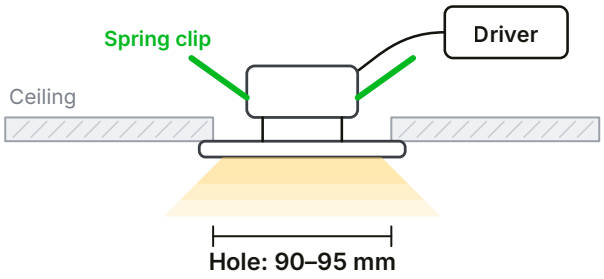

- 1 × 9 W smart downlight with built-in driver
- Lead with plug, attached to the light
- White cover fitted

YOU WILL NEED

- Drill with 90 mm hole saw
- Pencil
- Safety glasses and dust mask
- Smartphone with Bluetooth

BEFORE YOU START

- Check there is at least 57 mm of space above the ceiling.
- Use a plain on/off switch – not a dimmer.
- Install the Smart Life app on your phone.

STEP BY STEP

1. Electrician: turn the power off at the switchboard.
2. Electrician: mark and cut a round hole 90–95 mm wide in the ceiling.
3. Electrician: wire a 240 V plug base in the ceiling next to the hole, on the light switch circuit.
4. Electrician: plug the light's lead into the plug base.
5. Electrician: hold both spring clips up, push the light into the hole and let the clips hold it.
6. Turn the power on and leave the wall switch on.
7. Open the Smart Life app, turn on Bluetooth and tap 'Add device'. Follow the app to add the light.
8. Name the light and add it to a room or group.

SETTINGS & USE

- Colour, brightness and white tone are all set in the app.
- For Alexa, Google Home and control when you're away, add a Bluetooth Mesh Gateway.
- If the light won't pair, follow the reset steps shown on the app's 'Add device' screen.

DO NOT

- Don't connect it to a wall dimmer.
- Don't turn the wall switch off if you want to use the app.
- Don't spray water at it – only the front is IP54.

CARE & TROUBLESHOOTING

- Turn the power off and wipe with a soft, dry cloth.
- If the app can't find the light, move closer, turn the power off and on, and try again; if it still won't connect, call Greenhse on (08) 9297 2969.

Installation: Greenhse recommends that every product is installed by a licensed electrician to AS/NZS 3000 and local rules. Any work on 240 V wiring must be done by a licensed electrician. Incorrect installation can be unsafe and may void the warranty. **Warranty:** 3 years. Keep your invoice and the electrician's certificate of compliance. Questions? Call (08) 9297 2969 or visit greenhse.com.
